Regional Forest Agreements -
Review - Submission

25. 6. 19.

Department of Environment, Land,
Water & Planning.

The Regional Forest Agreements
must be subject to the
Environment Protection & Biodiversity
Conservation Act -
like other industries.

The present Regional Forest Agreements have
been an economic and environmental
disaster.

The loss & destruction of native bushland
has severe implications for our
FLORA & FAUNA.

Australia has the highest number of
mammals declared extinct since white
settlement.

I live in South Western Victoria and have
spent over 60 years studying, botanising &
having recreation in our forests.

Changes must be made to Regional Forest
Agreements - must be subject to the
assessment and approvals provisions of the
Environment Protection & Biodiversity Conservation
