

Submission to West RFA Proposal

Geelong – June 29 2019

I was a cog in the widespread public/community campaign twenty years ago that successfully stopped industrial clear-fell logging in the Otways.

I collected signatures for this petition, and I remember how universal the response was from the general public when they were given the opportunity to sign it “Oh yes! I’ll sign that”.

I suspect there is a desire now in 2019 to keep the door open for a future resumption of logging by government/forestry industry.

The RFA West was killed off years ago. Premier Steve Bracks declared in State Parliament that it was dead. Why are the state and federal governments now trying to keep it on life support?

Let the zombie regional forest disagreement die...
