Email: [REDACTED]

My submission message:

No excuses. Time to put nature first, before we have none left. Time to put the survival of the planet before finite jobs for a few (a few who could be retained to do something useful and sustainable).

Please listen to the Wilderness Society and use logic to protect our most important asset - our natural environment - above everything else.

We simply do not want short term profit for a few any more when this profit is raised from intentional death and destruction. How primitive we still are! Let's change this- NOW!

Thank you
